Text Decoration

The `text-decoration` property is used to set or remove decorations from text.

The value `text-decoration: none;` is often used to remove underlines from links:

Example

```
a {  
  text-decoration: none;  
}
```

  text-decoration: overline;  
}
```

}

Note: It is not recommended to underline text that is not a link, as this often confuses the reader.
