CSS Border Width

The `border-width` property specifies the width of the four borders.

The width can be set as a specific size (in px, pt, cm, em, etc) or by using one of the three pre-defined values: thin, medium, or thick:

Example

Demonstration of the different border widths:

```
p.one {  
  border-style: solid;  
  border-width: 5px;  
}  
  
p.two {  
  border-style: solid;  
  border-width: medium;  
}  
  
p.three {  
  border-style: dotted;
```

```
border-width: 2px;
}

p.four {
border-style: dotted;
border-width: thick;
}
```

Result:

5px border-width

medium border-width

2px border-width

thick border-width
