# CSS Comments

[< Previous](#)[Next >](#)

## CSS Comments

Comments are used to explain the code, and may help when you edit the source code at a later date.

Comments are ignored by browsers.

A CSS comment is placed inside the `<style>` element, and starts with `/*` and ends with `*/`:

### Example

```
/* This is a single-line comment */  
p {  
  color: red;  
}
```

[Try it Yourself >>](#)

You can add comments wherever you want in the code:

## Example

```
p {  
  color: red; /* Set text color to red */  
}
```

[Try it Yourself »](#)

Comments can also span multiple lines:

## Example

```
/* This is  
a multi-line  
comment */  
  
p {  
  color: red;  
}
```

# HTML and CSS Comments

From the HTML tutorial, you learned that you can add comments to your HTML source by using the `<!--...-->` syntax.

In the following example, we use a combination of HTML and CSS comments:

## Example

```
<!DOCTYPE html>  
<html>
```

```
<head>
<style>
p {
  color: red; /* Set text color to red */
}
</style>
</head>
<body>

<h2>My Heading</h2>

<!-- These paragraphs will be red -->
<p>Hello World!</p>
<p>This paragraph is styled with CSS.</p>
<p>CSS comments are not shown in the output.</p>

</body>
</html>
```
