

CSS Background Repeat

[< Previous](#)[Next >](#)

CSS background-repeat

By default, the `background-image` property repeats an image both horizontally and vertically.

Some images should be repeated only horizontally or vertically, or they will look strange, like this:

Example

```
body {  
  background-image: url("gradient_bg.png");  
}
```

[Try it Yourself »](#)

If the image above is repeated only horizontally (`background-repeat: repeat-x;`), the background will look better:

Example

```
body {  
  background-image: url("gradient_bg.png");  
  background-repeat: repeat-x;  
}
```

[Try it Yourself »](#)

Tip: To repeat an image vertically, set `background-repeat: repeat-y;`

CSS background-repeat: no-repeat

Showing the background image only once is also specified by the `background-repeat` property:

Example

Show the background image only once:

```
body {  
  background-image: url("img_tree.png");  
  background-repeat: no-repeat;  
}
```

[Try it Yourself »](#)

In the example above, the background image is placed in the same place as the text. We want to change the position of the image, so that it does not disturb the text too much.

CSS background-position

The `background-position` property is used to specify the position of the background image.

Example

Position the background image in the top-right corner:

```
body {  
  background-image: url("img_tree.png");  
  background-repeat: no-repeat;  
  background-position: right top;  
}
```
