

CSS Background Image

[< Previous](#)[Next >](#)

CSS background-image

The **background-image** property specifies an image to use as the background of an element.

By default, the image is repeated so it covers the entire element.

Example

The background image for a page can be set like this:

```
body {  
  background-image: url("paper.gif");  
}
```

[Try it Yourself >>](#)

Example

This example shows a **bad combination** of text and background image. The text is hardly readable:

```
body {  
  background-image: url("bgdesert.jpg");  
}
```

Try it Yourself »

Note: When using a background image, use an image that does not disturb the text.
